

# Connected Worker<sup>®</sup>

## Make a difference in your frontline operations.

Parsable's Connected Worker<sup>®</sup> streamlines your entire frontline operations, allowing you to maximize productivity, safety, and quality more than ever before.

### CONNECTED WORKER<sup>®</sup>

VS.

### TRADITIONAL SYSTEMS

#### Boost Scalability

Turn your frontline workers into engaged problem-solvers and accelerate your productivity. Connected Worker gives your plant managers the insights needed to drive productivity and growth.

#### Drive Operational Excellence with End-to-End Support

Connected Worker provides a fully-secure, end-to-end process, streamlining your operations and allowing your team to map and adapt complete workflows both on and offline.

#### Increase Data Speed and Quality

Connected Worker gives you a new level of visibility, allowing you to capture and generate the exact insights you need in real-time.

#### Become an Expert with Continued Partnership

Leverage data, education, and additional professional services from Parsable Academy to maximize collaboration and drive process improvements from implementation and beyond.

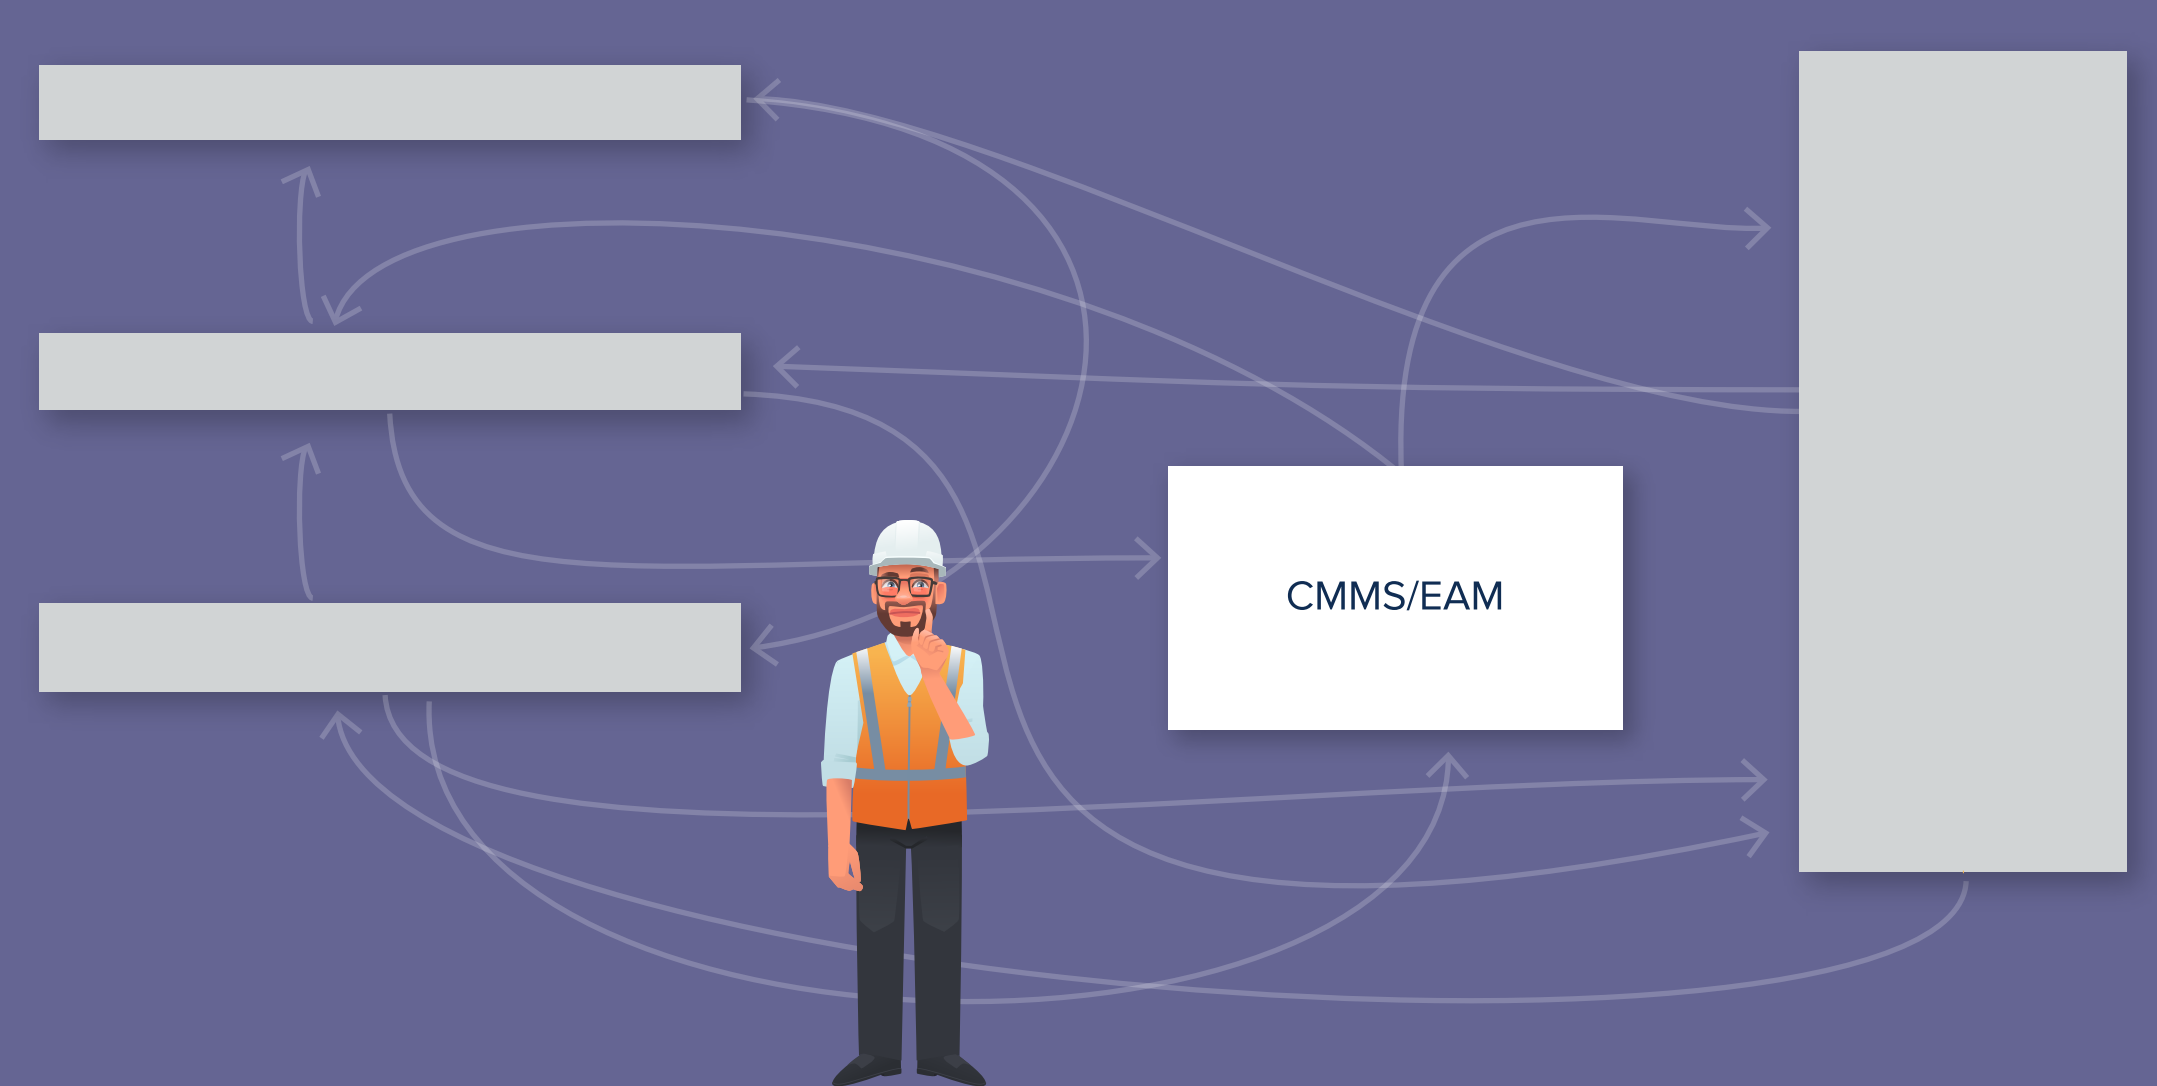

#### Enable a Truly Connected Workforce

Connected Worker is the only solution that connects to and then enhances your legacy systems and ecosystem of tools.

Traditional systems are fractured, limit visibility, and don't fully integrate into the way you work which stands in the way of growth.

Traditional systems lack visibility, come with isolating processes, and create barriers for true optimization.

MES\*, ERP\*, or CMMS\*\* systems focus on the what and when for frontline workflows, but are not designed to focus on how work is being done.

Traditional systems often come with complicated configurations and no knowledgebase, making them slow to implement and difficult to maintain.

Traditional systems don't build on your existing efforts, and can inhibit your digital transformation journey.
